

TimeSharing Login Procedure

Rachel Lamb

Abstract

I am unable to share samples directly from my current position as my company is a federal contractor for the United States government. However, I have based the following procedure on the style we use in-house.

The login procedure is for an app concept called TimeSharing, which would handle employee paid time off. I've built mockups of the app and have used those mockups as images in this procedure.

Login Procedure

After completing account configuration, you can log into the TimeSharing App. Logging in consists of two parts:

- 1 agreeing to the terms and conditions; and
- 2 entering your username, password, and multifactor authentication (MFA) code.

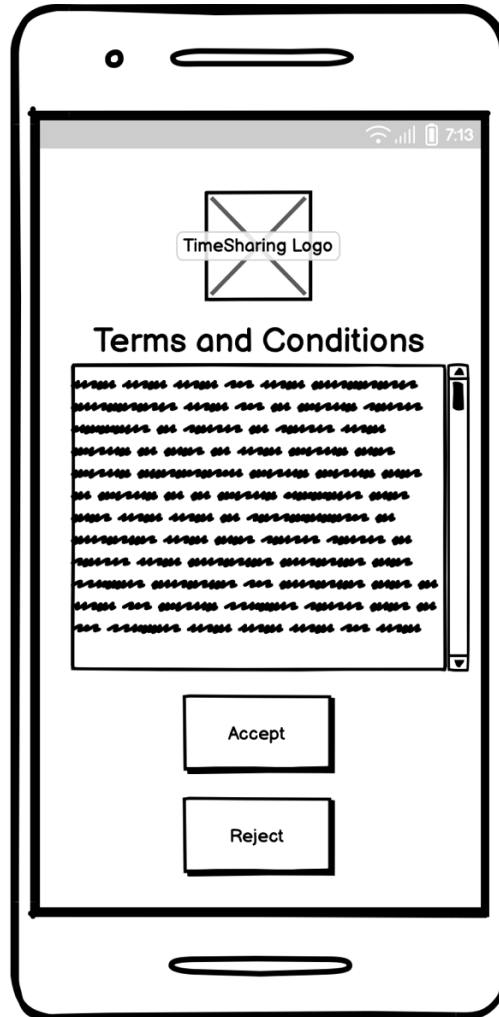

If you have not completed Account Configuration, please refer to *Section 0 Account Configuration*.

To log in to the TimeSharing app:

- 1 Open the TimeSharing App.

The Terms and Conditions Page loads.

Figure 1. Terms and Conditions Page

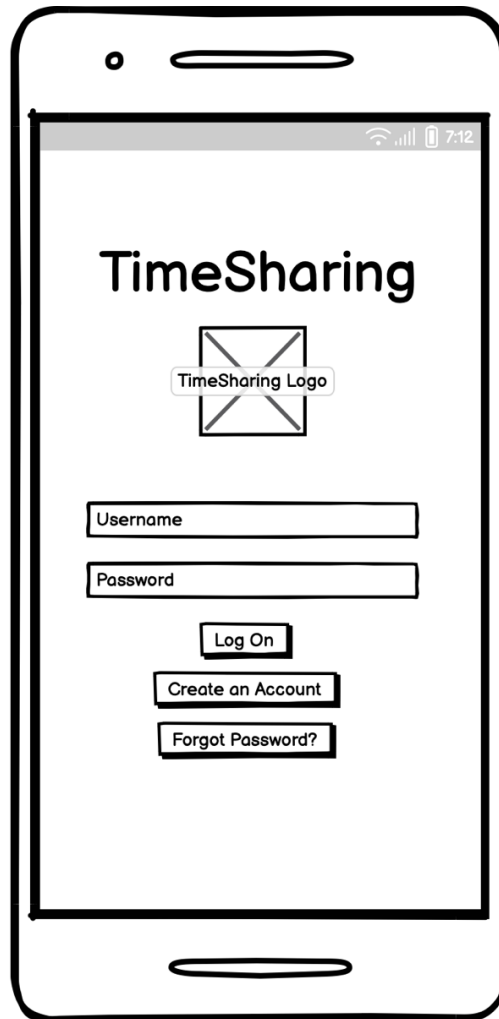

- 2 Read the Terms and Conditions, then click the **Accept** button.

WARNING: If you do not accept these terms, the TimeSharing App will load an Access Denied prompt and prevent you from accessing app content.

The Login Page loads.

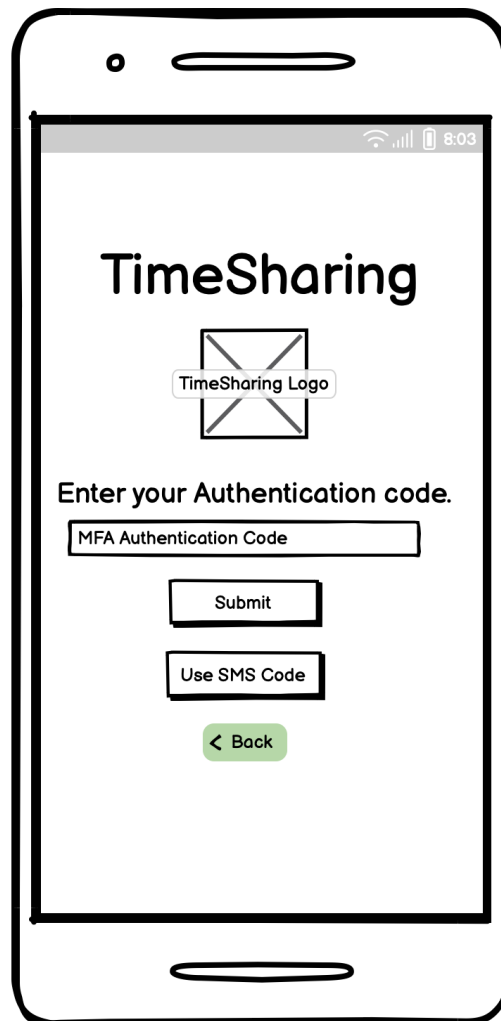

Figure 2. TimeSharing Login Page

- 3 Enter your username and password.
- 4 Click the **Log On** button.

The Multifactor Authentication Page loads.

- 5 Enter your MFA code.

NOTE: If you do not have access to your MFA device, you can authenticate with a code delivered by SMS. For more information, refer to *Section 1.2 Logging In Using an SMS Code*.

- 6 Click the **Submit** button.

The TimeSharing Home Page Loads.
